

The University of Toronto
Chemical Library

Presented
to
The University of Toronto Library
by
William Lash Miller, B.A., Ph.D., C.B.E.
Professor Emeritus of Physical Chemistry
for
A Departmental Library to be under
the control of the Professor of
Chemistry according to the conditions
set out in a letter from the Librarian
of the University dated March 21st
1938.

# P R E F A C E.

---

THIS General Collective Index extends from Volume I., which includes the First Proceedings of the Society in 1881, to Volume XIV.

It has been compiled by Mr. F. W. RENAULT, and the revision of this necessarily complex and arduous work has been carried out by a committee consisting of—

Messrs. B. E. R. NEWLANDS,

W. F. REID,

WATSON SMITH,

W. THORP.

In a work of this kind such revision, together with the frequent consultations and verifications involved, is of essential importance; but, whilst considerable delay may seem to have occurred, it is hoped that the time spent has been amply justified by the result attained.

---

# TABLE OF ERRATA.

| Page. | Column. | Line.                       | Description.                                                                                                                          |
|-------|---------|-----------------------------|---------------------------------------------------------------------------------------------------------------------------------------|
| 9     | 1       | 26 from bottom              | After page 184, insert " (iii, 1884) 166."                                                                                            |
| 19    | 2       | 11 "                        | For " Bohm " read " Bohme," and transfer overleaf under " Bohme."                                                                     |
| 21    | 1       | 22 "                        | Insert " Bosse and Witt, Otto N. " <i>Die Chemische Industrie auf der Columbischen Weltausstellung zu Chicago.</i> (xiii, 1894) 708." |
| 22    | 2       | Bottom line                 | For " Brand, H. O." read " Band, H. O.," and transfer to page 10.                                                                     |
| 23    | 1       | 15 from bottom              | For " Coal Juice " read " Cane Juice."                                                                                                |
| 26    | 1       | 1 "                         | Insert " Bucha. " <i>Hæmatoxylin and Brazilin.</i> (iii, 1884) 628."                                                                  |
| 29    | 2       | 27 from top                 | For " 896 " read " 986."                                                                                                              |
| 42    | 2       | 31 "                        | Insert " <i>See also under</i> Gasparin, M. P. de. 63."                                                                               |
| 59    | 2       | 20 "                        | After " (iv, 1885) 245," add " 418."                                                                                                  |
| 62    | 2       | 7 from bottom               | For " Galvalowski " read " Gawalowski," and transfer to page 64.                                                                      |
| 63    | 1       | 8 from top                  | For " Gantner, F." read " Gantter, F.," and transfer to follow line 33.                                                               |
| 63    | 1       | 34 "                        | Add, after " (viii, 1890) 1015," " (ix, 1890) 260, 1157."                                                                             |
| 64    | 1       | 14 "                        | For " Saulville " read " Snaville."                                                                                                   |
| 79    | 1       | 36 from bottom              | Add, after " (iii, 1884) 438," " (iv, 1885) 378."                                                                                     |
| 80    | 1       | 14 from top                 | For " Hensler, F." read " Hensler, F.," and transfer to follow line 20 from bottom, col. 2, page 81.                                  |
| 86    | 1       | 27 from bottom              | Insert " Houdes. " <i>Colchicine.</i> (iii, 1884) 530."                                                                               |
| 90    | 2       | 29 "                        | For " (xi, 1891) " read " (x, 1891)."                                                                                                 |
| 91    | 2       | 11 "                        | Add, after " <i>Industry.</i> ," " (ii, 1883) 363."                                                                                   |
| 93    | 2       | 13 "                        | For " Jurisch " read " Jurisch."                                                                                                      |
| 93    | 2       | 8 "                         | Add " <i>Die Fabrikation von Chlorsaurem Kali und anderen Chloraten.</i> (vii, 1888) 460."                                            |
| 98    | 2       | 25 from top                 | For " Knoblauch " read " Knublauch, O.," and transfer the reference to page 99, col. 1, line 7 from top.                              |
| 105   | 1       | 12 from bottom              | Insert " Lauer. " <i>Blasting under Water.</i> (iii, 1884) 192."                                                                      |
| 119   | 1       | 32 from top                 | For " Malay, R." read " Maly, R.," and transfer to follow line 19 from bottom.                                                        |
| 124   | 1       | 14 from bottom              | For " Meyer, E." read " Meyer, E. von."                                                                                               |
| 125   | 1       | 8 from top                  | For " Meygang, C.," read " Weygang, C.," and transfer to page 193, to follow line 43 from top, col. 2.                                |
| 126   | 2       | 4 "                         | Add " <i>Gold, Separation of, with Br and H Br.</i> (P) (iv, 1885) 405."                                                              |
| 134   | 1       | 20 "                        | Transfer " <i>Researches on Explosives.</i> " to follow line 28 lower.                                                                |
| 134   | 1       | 28 "                        | For " Noble, Capt." read " Noble, Capt. Sir A."                                                                                       |
| 137   | 2       | 37 "                        | After page 228, add " , 317."                                                                                                         |
| 140   | 1       | 30 "                        | Add " <i>See also under</i> Palangie and Bedu."                                                                                       |
| 141   | 2       | 13 from bottom              | For " Moller " read " Moller."                                                                                                        |
| 149   | 1       | 36 "                        | For " Reinhardt " read " Reihardt," and transfer to follow line 18 below.                                                             |
| 157   | 2       | 31 "                        | For " <i>See</i> Gaulville," &c., read " <i>Blasting Material, Manufacture of.</i> "                                                  |
| 157   | 2       | 32 "                        | After page 118, add " (iii, 1884) 190."                                                                                               |
| 169   | 2       | 26 from top                 | After page 9, add " , 64."                                                                                                            |
| 170   | 2       | 24 from bottom              | For " Société Lafarge " read " Société Lafarge."                                                                                      |
| 171   | 1       | 14 "                        | For " Soler, J." read " Soler y Vila, J."                                                                                             |
| 172   | 1       | 17 "                        | After this line, insert " Spennrath, J. Wool, Use of Unsaponifiable Oils for Greasing. (xiv, 1895) 362."                              |
| 185   | 2       | Bottom line                 | For " Vibraus-Calvorde " read " Vibraus-Calvörde."                                                                                    |
| 187   | 2       | 25 from top                 | After this line, insert " Von Meyer, E. <i>See under</i> Meyer, E."                                                                   |
| 187   | 2       | 46 "                        | For " Vortman " read " Vortmann."                                                                                                     |
| 193   | 2       | 43 "                        | After this line, add transfer from page 125, col. 1, line 8 from top.                                                                 |
| 195   | 1       | Top line                    | For " Smelting " read " Melting."                                                                                                     |
| 199   | 2       | 8 from bottom               | For " Yettel, W." read " Jettel, W.," and transfer to page 91, col. 2, line 11 from bottom.                                           |
| 247   | 2       | 21 "                        | After page 128, insert " , 352."                                                                                                      |
| 295   | 2       | Bottom line                 | After page 48, add " , 277."                                                                                                          |
| 295   | 2       | 43 and 44 from bottom       | To be combined.                                                                                                                       |
| 320   | 1       | 21 from top                 | After this line, insert—<br>" Kinetite " ;<br>(Smith.) (vi, 1887) 2.<br>" Experiments with. (iv, 1885) 509."                          |
| 333   | 1       | 44 from bottom              | After this line, insert " Apparatus for De-gumming Fibres from. (P) Burrows and Radclyffe. (xiv, 1895) 964."                          |
| 355   | 2       | 39 and 40 from bottom       | To be combined.                                                                                                                       |
| 362   | 1       | 35 from bottom              | After this line, add " Homopiperidinic Acid and Piperidinic Acid, Synthesis of. (Gabriel.) (ix, 1890) 961."                           |
| 367   | 1       | 23 "                        | After this line, insert " <i>See also under</i> Quinol."                                                                              |
| 375   | 1       | 28 "                        | After page 276, add " , 352."                                                                                                         |
| 392   | 2       | 16 from top                 | After " <i>Titration</i> " add " (Lenoble.) "                                                                                         |
| 435   | 2       | 8, 9, and 10 from bottom.   | To be combined.                                                                                                                       |
| 449   | 1       | 34 from bottom              | After page 128, add " , 352."                                                                                                         |
| 465   | 1       | 1, 5, 8, and 9 from bottom. | For " Answers " read " Auwers."                                                                                                       |

# Journal of the Society of Chemical Industry.

## INDEX OF VOLS. I. to XIV.

### INDEX OF AUTHORS' NAMES.

N.B.—In this Index (P) indicates that the matter referred to is an abstract of a Patent.

The titles of books are given in quotation marks.

The figures in brackets refer to volume numbers (Roman) and year of publication (Arabic).

#### LIST OF ABBREVIATIONS.

|               |                     |               |                     |              |                     |
|---------------|---------------------|---------------|---------------------|--------------|---------------------|
| App. ....     | Apparatus           | Extract. .... | Extraction,ing      | Prep. ....   | Preparation         |
| Applic. ....  | Application,able    | Ferment. .... | Fermentation,ing    | Prev. ....   | Prevention,ing      |
| Artif. ....   | Artificial          | Formn. ....   | Formation           | Prod. ....   | Produce,tion,ing    |
| Atmos. ....   | Atmospheric,sphere  | Gen. ....     | Generation,ing      | Protec. .... | Protection,ing      |
| Aurif. ....   | Auriferous          | Inpt. ....    | Improvement,s       | Purif. ....  | Purification,tying  |
| Charac. ....  | Character,istic,s   | Infl. ....    | Influence           | Qual. ....   | Quality,tative      |
| Chem. ....    | Chemical,s,istry    | Manuf. ....   | Manufacture,ing     | Quant. ....  | Quantity,tative     |
| Co. ....      | Company             | Mat. ....     | Matter,s            | Rectif. .... | Rectification,tying |
| Col. ....     | Colour,s,ation,ing  | Min. ....     | Mineral,s           | Separ. ....  | Separation,ing      |
| Comp. ....    | Composition,pound,s | Modif. ....   | Modification,tying  | Soc. ....    | Society,Societe     |
| Concent. .... | Concentration,ing   | Nat. ....     | Natural             | Sp. Gr. .... | Specific Gravity    |
| Decomp. ....  | Decompose,ition,ing | Org. ....     | Organic,ism,s       | Temp. ....   | Temperatures,s      |
| Detec. ....   | Detection,ing       | Photo. ....   | Photography,graph,s | Util. ....   | Utilisation,ing     |
| Determ. ....  | Determine,ation,ing | Physiol. .... | Physiology,ical     | Veg. ....    | Vegetable,s,tion    |
| Distill. .... | Distillate,tion,ing | Ppn. ....     | Precipitation       | Volum. ....  | Volumetric          |
| Estim. ....   | Estimate,tion,ing   |               |                     | Vorm. ....   | Vormals             |
| Evap. ....    | Evapor,e,tion,ing   |               |                     |              |                     |
| Exam. ....    | Examine,ation,ing   |               |                     |              |                     |
| Expts. ....   | Experiments         |               |                     |              |                     |

| Abadie, A. Edge Runners for Paper-making. (P) (ix, 1890) ..                                 | 321  |
| Abakanowicz. See Hering. (x, 1891) ..                                                       | 470  |
| Abakanowicz, B. A., and d'Arsonval, A. Electric Batteries. (P) (viii, 1889) ..              | 402  |
| Abbé, R. W. F. Treating Oxidised Lead and App. therefor. (P) (xii, 1895) ..                 | 274  |
| Abbot, H. C. S., and Trimble, H. Occurrence of Solid Hydrocarbons in Plants. (vii, 1888) .. | 757  |
| Abbott, Decomp. of Blasting Gelatine. (iii, 1884) ..                                        | 647  |
| Comp. of Explosives. (v, 1886) ..                                                           | 502  |
| Abbott, R. B. Process of Treating Iron. (P) (iv, 1885) ..                                   | 225  |
| Abbott, W., and Wilks, W. R. Manuf. of Rubber-coated Fabrics. (P) (xiii, 1894) ..           | 248  |
| Abegg, R. Amidoehydrone. (ix, 1890) ..                                                      | 600  |
| Abegg, W. A. Quicksilver in Russia. (viii, 1889) ..                                         | 657  |
| Abel, C. D. Fatty Acids and Glycerine, App. for Direct Prod. of. (P) (v, 1886) ..           | 384  |
| Landin. (P) (v, 1886) ..                                                                    | 672  |
| Launlin from Wool-washing Liquors. (P) (vi, 1887) ..                                        | 147  |
| Soda Crystals, Production of, by Ammonia Process. (P) (iii, 1884) ..                        | 250  |
| Abel, Sir F. A. Address to London Section. (i, 1882) ..                                     | 2    |
| Explosives, Smokeless. (ix, 1890) ..                                                        | 325  |
| Imperial Institute, On the Work of the. (vi, 1887) ..                                       | 458  |
| Iron and Steel, Carbon in. (iv, 1885), 284; (v, 1886), 433                                  |      |
| Petroleum, Flashing Test for. (i, 1882) ..                                                  | 471  |
| Presidential Address. (ii, 1883) ..                                                         | 302  |
| And Deering. Carbon in Steel. (iii, 1884) ..                                                | 178  |
| And Dewar, J. Explosives, Manuf. of. (P) (i, ix, 1890), 764, 765; (xi, 1892) ..             | 709  |
| And others. Explosives, App. for Manuf. of. (P) (ix, 1890) ..                               | 803  |
| And Redwood, B. Lamps, Mineral Oil. (v, 1886) ..                                            | 469  |

#### Abel, Sir F. A.—cont.

|                                                                                              |      |
|----------------------------------------------------------------------------------------------|------|
| And Redwood. Abel Petroleum Testing App. in Tropical Climates, Employment of. (iii, 1884) .. | 318  |
| Abell, W. P. See Fletcher. (v, 1886) ..                                                      | 94   |
| Saccharine Liquors, &c. Filtering App. for. (P) (xii, 1895) ..                               | 510  |
| Sugar, Centrifugal Machines for Manuf. of. (P) (viii, 1889) ..                               | 407  |
| And Essequibo, Destructor Furnaces. (P) (xiv, 1895) ..                                       | 1058 |
| Abenius, W. See Lunge, G. (xiv, 1895) ..                                                     | 35   |
| Aberson, J. H. See Giltay, E. (xiv, 1895) ..                                                 | 764  |
| Abert, W. B., and Scherer, W. Paints. (P) (xii, 1893) ..                                     | 700  |
| Abney, W. de W. "Colour Measurement and Mixture." (x, 1891) ..                               | 490  |
| Photometer, Accuracy of Grease Spot. (ix, 1890) ..                                           | 722  |
| Photometer Measures, Grease Spot. (x, 1891) ..                                               | 18   |
| Photometry, Colour. (x, 1891) ..                                                             | 1031 |
| See Hummel. (xiii, 1894) ..                                                                  | 803  |
| Abom, J. W. Bleaching Paper Pulp. (P) (xiii, 1894) ..                                        | 824  |
| And Landin, J. Tanning Hides and Skins. (P) (vi, 1887) ..                                    | 514  |
| Abraham, K. Use of Sulphurous Acid in Sugar Manuf. (xiii, 1894) ..                           | 165  |
| Abraham, A. C. Ether. (xi, 1892) ..                                                          | 835  |
| Abraham, E. See Fenn. (xiii, 1894) ..                                                        | 896  |
| Abraham, K. Gaseous Currents of Lead Chambers. (i, 1882) ..                                  | 106  |
| Abriot, M. Producing Cloisonne Designs. (P) (vii, 1888) ..                                   | 503  |
| Abt, A. See Noetting, E. (vii, 1888) ..                                                      | 562  |
| Abthorpe, W. H. Mashing Grain for Brewing. (P) (i, 1882) ..                                  | 243  |
| Acheson, E. G. Carbonaceous Compounds, Prod. of Crystal-line. (P) (xii, 1893) ..             | 847  |
| Carbons for Electric Lamps, &c. (P) (xiii, 1894) ..                                          | 1207 |
| Electricity or Magnetism, Gen. of. (P) (viii, 1889) ..                                       | 901  |
| Furnaces, Electrical. (P) (xiv, 1895) ..                                                     | 585  |
| Achor, S. T. Soluble Chocolate. (P) (xi, 1892) ..                                            | 433  |
| Ackerman, F. Substantive Dyestuffs in Dyeing Half-Wool Goods. (xiii, 1894) ..                | 386  |

|                                                                                                                                                                    | PAGE     |                                                                                                  | PAGE     |
